

**WEB DEVELOPER  
(Contractual)**

The Michigan State Appellate Defender Office (SADO) seeks to contract with a web developer to enhance its web site which serves as a resource portal for the criminal defense community. The site, [www.sado.org](http://www.sado.org), primarily needs the addition of a robust training feature that will allow attorneys to register for training through the site, provide the ability to complete training online, confirm that the training has occurred, and provide the ability to view training history. Additional enhancements to the site, such as the ability to view subscriber and order status, are also needed and will be discussed with the selected contractor. The contractor will work with SADO's Systems Analyst/Site Administrator and Training Director to complete the upgrades. We are looking for a self-starter to work remotely and devote 10 hours a week or more to this project for \$75/hour. The ideal person will have both back-end and front-end experience and must have strong working knowledge of the following: T-SQL, .NET, C#, MVC, JavaScript, JQuery, HTML, SQL, Entity Framework, and CSS.

**TO APPLY:** Submit a letter of interest and resume by February 2, 2018 to:
